

OUR HUMAN DNA

Continuous personal growth and increased prosperity in every area of our lives are natural states in which we can and should live. Unfortunately, this type of lifestyle is not normal and therefore only enjoyed by a ridiculously small percentile of the population.

Our human DNA, effectively expressed, is always for expansion and fuller expression. We are made in the image and likeness of the architect of the universe and laws of nature. The spark within us is always consolidating into awareness or fragmenting into the awareness of the created.

We are alive more fully when our attention is focused in the NOW moment. We lose our keen focus of being alive when we dwell on the memory of the past... often coupled to multiple regrets for choices made poorly or not made at all. We are the confluence of a genetic pool of ignorance which dates back for many generations. The true beauty, the genius and the infinite power of our being has been buried under layer upon layer of damaging virus code from the moment of conception. These viruses have distorted our values, blinded us from what is really important and twisted the truth to the point that we are denying ourselves on a daily basis many of the joys and much of the fulfillment that we can experience in life.

The Ed TiC/NI™ has been designed to assist us in expressing the true beauty that lies within our own DNA, which can only be accomplished by eliminating the many viruses that have been passed down to us from our family tree.

Do not permit the apparent simplicity of our REGENT research on TiC/NI™ to deceive us. All information has been created to assist us to eliminate viruses and take control of our lives. We have graduated from the time where people were paid for what they knew. Today, it is absolutely essential that we perform. And, to perform at peak potential, it is necessary that we eliminate the many viruses that have always obstructed us progress. We all need to embrace AI now.

Intellectual comprehension of this material is not difficult. In a relatively short period of time, we will be prepared to correctly answer a battery of questions about this information. Then, we could very quickly say "I KNOW" with respect to the various topics you are about to study at TiC/NI™ with REGENT. However, KNOWING and DOING are poles apart. Our objective in the world of TiC/NI™ is to close the distance within the Knowing/Doing gap. A blanket objective of every individual entering the TiC/NI™ program should be to turn our life into a joyful experience.

**“Education does not mean teaching people what they do not know.
It means teaching them to behave as they do not behave.”**
